EXPERIENCE

Viewnext (IBM), Madrid - Remote, Full Stack Developer

Oct 2021 - PRESENT

https://www.viewnext.net/

Working as a Full Stack developer, I **developed several features** and enhancements over an existing API in **Symfony(5)**, applying SOLID, DDD architecture and Clean Code, my main work was implementing and developing new features and fixing existing bugs with **Angular(11)** (graphs, data tables, **real-time stocks info**) also **optimizations, cleaning legacy code and refactoring** code for bank sector (Santander Bank).
(Front 90%, Back 10%).

Bank & Financial Services

TRM Software, Seville, CTO, ***Full Stack Developer and System Architect***

Mar 2021 - Oct 2021

https://www.trmsoftware.net/

Working as a Full Stack developer **building hybrid apps** (FLUTTER), monolithic web apps (Laravel, WP), customizing ERP (Odoo), working in **APIs and Microservices** (Laravel Rest API, Django Rest).

As a CTO of the company I talk with customers, organize work for 3-5 workers and design the technological path of the company (Front 50%, Back 50%)

IT and ERP (Own company)

Soluciones C2, Seville— ***Full Stack Developer***

May 2018 – Mar 2021

https://www.solucionesc2.com/

Working as a Full Stack developer **building hybrid apps** (IONIC), monolithic web apps (Laravel, KumbiaPhp, WP, Drupal), API (Laravel Rest API), **consuming SOAP API services** (SageX3).

I do continuous deployment sometimes working for 4 big companies at the same time guaranteeing the disponibility of the software developed. (Front 45%, Back 55%)

IT and Marketing Sector

Wolfcrass Software, Seville — ***CTO & Devops Manager***

March 2017 - May 2018

As devops manager I have coordinated three diferent teams to deliver our own product focused on the energetic. I used docker, jenkins, unitary testing and CD on three diferent stages of the same server.

We developed a CRM focused on the energetic sector and various diferent webpages. (Front 20%, Back 80%)

Energetic Sector (Own Startup)
